Professional Burnout in Medicine and the Helping ...

Physician burnout has been classified as a psychological syndrome that can be expressed as a prolonged response to due chronic occupational stressors. In the practice of medicine, it has been known to affect a wide variety of individuals from medical students to practicing physicians; although, its impact reaches far beyond that. Because of the toll taken on the healthcare industry, various treatment and prevention strategies have been developed at individual, team, and organizational levels in

Occupational burnout - Wikipedia

By Mayo Clinic Staff Job burnout is a special type of work-related stress — a state of physical or emotional exhaustion that also involves a sense of reduced accomplishment and loss of personal identity.

"Burnout" isn't a medical diagnosis. Some experts think that other conditions, such as depression, are behind burnout.
