This 1994 book asserts that the experience of development differs along gender lines.

Interactive Minds harnesses both research and theory from several disciplines to study cognitive development in the social context of the life course.

The field of emotions research has recently seen an unexpected period of growth and expansion, both in traditional psychological literature and in gerontology. The Handbook of Emotion, Adult Development, and Aging provides a broad overview and summary of where this field stands today, specifically with reference to life course issues and aging. Written by a distinguished group of contributing authors, the text is grounded in a life span developmental framework, while advancing a multidimensional view of emotion and its development and incorporating quantitative and qualitative research findings. The book is divided into five parts. Part One discusses five major theoretical perspectives including biological, discrete emotions, ethological, humanistic, and psychosocial. Part Two on affect and cognition discusses the role of emotion in memory, problem solving, and internal perceptions of self and gender. Part Three on emotion and relationships expands on the role of emotion in sibling and parent/child relationships, as well as relationships between friends and romantic partners, and the emotional reaction to interpersonal loss across the life span. Part Four on stress, health, and psychological well-being treats issues of stress and coping, religion, personality, and quality of life. The final part on continuity and change in emotion

patterns and personality discusses emotion and emotionality throughout the life span. An ideal reference source for professionals across a wide range of disciplines, the text summarizes recent important developments in this fast growing area of psychology and proposes many new directions for future research. Provides a biopsychological view on emotion in adulthood from a life span context Presents the new perspective on emotion in older adults actively engaged in emotion self-regulation Describes the intimate connection between emotion and the structure of personality Demonstrates a new perspective on what emotion is, its importance across the life span, its connections with cognition, its role in interpersonal relation, and the way it influences both stability and change in adulthood Illustrates the interpersonal nature of emotion Provides theoretically based, leading edge research from international authors Five areas of coverage include: Theoretical perspectives Affect and cognition Emotion and relationships Stress, health, and psychological well-being Continuity and change in emotion patterns and personality Coverage includes: Five major theoretical perspectives, including biological, discrete emotions, ethological, humanistic, and psychosocial The role of emotion in memory, problem-solving, and internal perceptions of self and gender The role of emotion in sibling and parent/child relationships, relationships between friends and romantic partners, and the emotional reaction to interpersonal loss across the lifespan Issues of stress and coping, religion, personality, and quality of life Emotion and emotionality throughout the lifespan

Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience. Greene critically reviews traditional and contemporary theoretical approaches — ranging from orthodox psychoanalysis to relational and post-modern theories — and

argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past. These theories, she believes, should be rejected because of their inherent lack of validity and their frequently oppressive implications for women. Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality, emergence and human agency. The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature, socio-cultural context and personal history. Updated for a new generation of readers, *The Psychological Development of Girls and Women* will continue to be essential reading for students and researchers in the psychology of women, developmental psychology and women's studies.

This long-awaited, magisterial study—an unparalleled blend of philosophy, poetry, and philology—draws on theories of sexuality, phenomenology, comparative religion, philological writings on Kabbalah, Russian formalism, Wittgenstein, Rosenzweig, William Blake, and the very physics of the time-space continuum to establish what will surely be a highwater mark in work on Kabbalah. Not only a study of texts, *Language, Eros, Being* is perhaps the fullest confrontation of the body in Jewish studies, if not in religious studies as a whole. Elliot R. Wolfson explores the complex gender symbolism that permeates Kabbalistic literature. Focusing on the nexus of asceticism and eroticism, he seeks to define the role of symbolic and poetically charged language in the erotically configured visionary imagination of the medieval Kabbalists. He demonstrates that the traditional Kabbalistic view of gender was a monolithic and androcentric one, in which the feminine was conceived as being derived from the masculine. He does not shrink from the negative implications of this doctrine, but seeks to make an honest

acknowledgment of it as the first step toward the redemption of an ancient wisdom. Comparisons with other mystical traditions-including those in Christianity, Buddhism, and Islam-are a remarkable feature throughout the book. They will make it important well beyond Jewish studies, indeed, a must for historians of comparative religion, in particular of comparative mysticism. Praise for Elliot R. Wolfson: "Through a Speculum That Shines is an important and provocative contribution to the study of Jewish mysticism by one of the major scholars now working in this field."-Speculum

Adult Educational Psychology is useful for those encountering psychology as a subject in adult education courses as well as those with an interest in the psychology of adult development. It is directly relevant for teachers in higher education, instructors in technical and further education, staff development and human resource practitioners as well as community educators.

Offering a uniquely psychoanalytic developmental perspective on male gender identity and the sense of maleness, this book provides an in-depth analysis of the development of masculinity in childhood and its continued evolution throughout a man ' s life. Drawing on classical Freudian theory, as well as on more contemporary psychoanalytic theories, this book explores early infancy and child development, preoedipal factors and the oedipal complex, the influence of parenting and the unconscious transmission of gendered factors both by mothers and both biological and symbolic fathers, the male ego ideal, social, cultural, and biological influences, the role of inherent psychic bi-generality in the context of gender binaries, and the inherent gendered tensions and challenges experienced as an individual progresses into adult and later life. This book is original in its characterization of the male developmental trajectory as underpinned by psychoanalytic principles pertaining to conflict and inherent tensions that continue

throughout the life cycle and strongly impact other areas of life. Deeply rooted in the unconscious, a man ' s multiply determined sense of masculinity requires deconstructing the mother, the feminine, and the other in the male psyche. As the text illustrates via clinical vignettes, an awareness and an understanding of these areas can improve the clinical work of psychoanalysts working with men who struggle with the intrinsic conflicts in their sense of maleness. This book will be of great clinical value to psychoanalysts, psychotherapists and other mental health practitioners, and will stimulate the thinking of scholars in such areas as gender theory, psychodynamic and sociocultural aspects of gender roles, and the changing social definition of masculinity.

The bringing together of the arts and qualitative inquiry is changing the face of social science research. The increasing shift toward arts-based research has raised complex questions, such as how to evaluate its quality and even whether distinctions exist between what is art and what is research. In this defining work, Gary Knowles and Ardra Cole bring together the top scholars in qualitative methods to provide a comprehensive overview of where arts-based research has come, and where it is going. Through various categories of art and art-based research - namely epistemological, historical, methodological, thematic - will address all the significant issues of conceiving and conducting arts-based or arts-informed research in the social sciences and humanities, as well as the challenges of composing final representations of the research.

Charts for the first time the scholarship on religion and emotion, gathering 1,200 entries from scholarly literature in various fields.

In recent years there have been substantial changes in approaches to how genders are made and what functions genders fulfill. Most of the scholarly focus in this area has been in the areas of feminist, gay, and lesbian studies, and heterosexual masculinity - which tended to be defined by lack and absence - has not received the critical and scholarly attention these other areas have received. *Heterosexual Masculinities* rethinks a psychoanalytic tradition that has long thought of masculinity as a sort of brittle defense against femininity, softness, and emotionality. Reflecting current trends in psychoanalytic thinking, this book seeks to understand heterosexual masculinity as fluid, multiple, and emergent. The contributors to this insightful volume take new perspectives on relations between men, men's positions as fathers in relation to their sons and daughters, the clinical encounter with heterosexual men, the social contexts of masculinity, and the multiplicity of heterosexual masculine subjectivities. What to a previous generation would have appeared as pathological or defensive, we now encounter as forms of masculine subjectivity that include wishes for intimacy, receptivity, and surrender, alongside ambition and the pleasures of "phallic narcissism."
