Perfect for residents, pediatricians, practitioners, or parents seeking further information, Smith ' s Recognizable Patterns of Human Deformation provides evidence-based management for a range of common pediatric problems affecting the limbs and craniofacial region. The only source devoted to the diagnoses and management of birth defects resulting from mechanical forces, this reference supplies the essential guidance needed for timely intervention and effective treatment.

In the current parlance of dysmorphology, deformations are normal tissue responses to unusual mechanical forces, and disruptions represent breakdown of previously normal tissues. These 2 categories are distinguished from malformations and dysplasias, which reflect primary errors in morphogenesis or tissue structure, respectively.
