Whether living in an urban sprawl, a sunny suburb or rolling countryside, the taxi is a mode of transport that no doubt every resident of the UK will use in their lives. So prevalent is it in British society that the black cab has become one of the most iconic symbols of the country and its capital. Here Danny Roth presents the most comprehensive history of the taxi service of Britain complete with in-depth appendices and a wide-ranging, fascinating collection of 250 taxi images. Beginning from the birth of the taxi, four millennia before Christ, through Victorian times to the present day with views on the future, no stone is left unturned in this history of British taxi service. Accessibly written and filled with technical detail, this is a volume no car or taxi enthusiast can do without.

The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War. Höhler's study brings together technology, science and ecology to explore the way this latter-day ark was invoked by politicians, environmentalists, cultural historians, writers of science fiction and many others across three decades.

Des travaux récents ont montré combien les jeunes s'engageaient autrement, dans des domaines aussi variés que possible. Rédigé par autant de chercheuses investies depuis plusieurs années dans ces champs d'étude, ce livre a pour but de mieux comprendre les contours et les processus particuliers de l'engagement des jeunes en difficulté. Au-delà de son utilité en matière de réflexions théoriques, méthodologiques et empiriques, cette mise en commun se veut également une véritable prise de position épistémologique qui consiste à replacer le discours de la jeunesse au centre de l'objet de recherche.

This monograph is the first large-scale corpus analysis of French *il y a* clefts. While most research on clefts focusses on the English 'prototypical' *it*-cleft and its equivalents across languages, this study examines the lesser-known *il y a* clefts - of both presentational-eventive and specificational type - and provides an in-depth analysis of their syntactic, semantic and discourse-functional properties. In addition to an extensive literature review and a comparison with Italian *c'è* clefts and with French *c'est* clefts, the strength of the study lies in the critical approach it develops to the common definition of clefts. Several commonly used criteria for clefts are applied to the corpus data, revealing that these criteria often lead to ambiguous results. The reasons for this ambiguity are explored, thus leading to a better understanding of what constitutes a cleft. In this sense, the analysis will be of interest to specialists of Romance and non-Romance clefts alike.

No judgement of taste is innocent - we are all snobs. Pierre Bourdieu's *Distinction* brilliantly illuminates the social pretensions of the middle classes in the modern world, focusing on the tastes and preferences of the French bourgeoisie. First published in 1979, the book is at once a vast ethnography of contemporary France and a dissection of the bourgeois mind. In the course of everyday life we constantly choose between what we find aesthetically pleasing, and what we consider tacky, merely trendy, or ugly. Taste is not pure. Bourdieu demonstrates that our different aesth

This publication has been designed to assist member States in integrating transport, health, quality of life and environmental objectives into urban and spatial planning policies. It provides many references to case studies, good practices and examples from cities across the Euro-Asian region (and beyond) covering a wide array of thematic areas, including: the future of sustainable urban mobility; spatial planning in function of sustainable urban mobility and accessibility; public transport planning as a cornerstone of sustainable urban mobility; active mobility and how it promotes health and the

environment; and the potential of Intelligent Transport Systems in an urban context. The publication puts forward a methodology for sustainable urban transport planning and introduces a concise set of key messages and recommendations as an input to the Fifth High-level Meeting on Transport, Health and Environment which takes place in Vienna from 26-27 November 2020.

Les principaux thèmes d'actualité des domaines clés des concours (culture générale, questions sociales, économie, relations internationales) sont présentés sous forme de fiches pour faire le point et se préparer aux concours. Chaque thème est développé de manière claire et approfondie selon des aspects et une méthode bien structurés proposant : une présentation du thème et de ses enjeux ; un historique regroupant les grandes dates à connaître ; les connaissances de base présentant une analyse claire des éléments essentiels du sujet ; le bilan de l'actualité exposant le thème dans son contexte le plus proche et précisant toutes ses évolutions actuelles ; les perspectives développant la réflexion sur l'avenir et les évolutions possibles du sujet. L'ouvrage, rédigé par une équipe de spécialistes dans chaque discipline, est un outil indispensable pour la préparation des épreuves écrites et orales.

In the age of post-digital architecture and digital materiality, *This Thing Called Theory* explores current practices of architectural theory, their critical and productive role. The book is organized in sections which explore theory as an open issue in architecture, as it relates to and borrows from other disciplines, thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices. The sections move gradually from the specifics of architectural thought - its history, theory, and criticism - and their ongoing relation with philosophy, to the critical positions formulated through architecture's specific forms of expression, and onto more recent forms of architecture's engagement and self-definition. The book's thematic sessions are concluded by and interspersed with a series of shorter critical position texts, which, together, propose a new vision of the contemporary role of theory in architecture. What emerges, overall, is a critical and productive role for theory in architecture today: theory as a proposition, theory as task and as a 'risk' of architecture.

This volume collects the best scientific contribution presented in the 3rd World Conference on Terraced Landscapes held in Italy from 6th to 15th October 2016, offering a deep and multifaceted insight into the remarkable heritage of terraced landscapes in Italy, in Europe and in the World (America, Asia, Australia). It consists of 2 parts: a geographical overview on some of the most important terraced systems in the world (1st part), and a multidisciplinary approach that aims to promote a multifunctional vision of terraces, underlining how these landscapes meet different needs: cultural and historical values, environmental and hydrogeological functions, quality and variety of food, community empowerment and sustainable development (2nd part). The volume offers a great overview on strengths, weaknesses, functions and strategies for terraced landscapes all over the world, summarizing in a final manifest the guidelines to provide a future for these landscapes as natural and cultural heritage.
