If the number to the right is 4 or less (4, 3, 2, 1, or 0), the underlined digit stays the same and all numbers behind it becomes zeros. (It rounds down.) There is a 2 in the hundreds place, therefore, the 5 stays the same. All numbers behind it becomes zeros. 5,278 rounds to 5,000. This means that 5,278 is closer to 5,000 than 6,000.

Focus topics include main idea and details, making inferences, summarizing, predicting, citing text evidence, author's purpose, and much more. Perfect for whole-class, group, or independent learning.

"From the education experts at The Princeton Review"--Cover.

Features an audio read-along! A creative spirit learns that thinking "ish-ly" is far more wonderful than "getting it right" in this gentle new fable from the creator of the award-winning picture book *The Dot*. Ramon loved to draw. Anytime. Anything. Anywhere. Drawing is what Ramon does. It's what makes him happy. But in one split second, all that changes. A single reckless remark by Ramon's older brother, Leon, turns Ramon's carefree sketches into joyless struggles. Luckily for Ramon, though, his little sister, Marisol, sees the world differently. She opens his eyes to something a lot more valuable than getting things just "right." Combining the spareness of fable with the potency of parable, Peter Reynolds shines a bright beam of light on the need to kindle and tend our creative flames with care.

This video uses statistics from six national surveys of teachers conducted by the National Center for Education Statistics (NCES) of the U.S. Department of Education to present a comprehensive view of the teaching profession.

"This resource supports new and experienced educators who want to prepare for and design purposeful number talks for their students; the author demonstrates how to develop grade-level-specific strategies for addition, subtraction, multiplication, and division. Includes connections to national standards, a DVD, reproducibles, bibliography, and index"--Provided by publisher.

Clever Coyote thinks it's time for lunch — and also time to show her friends how, with some simple rounding, she can add up numbers in her head. If only she were as good at hunting as she is at math!
