## Senior Storage Engineer with Storage Area Networking (SAN

...

A storage area network or storage network is a computer network which provides access to consolidated, block-level data storage. SANs are primarily used to access storage devices, such as disk arrays and tape libraries from servers so that the devices appear to the operating system as direct-attached storage. A SAN typically is a dedicated network of storage devices not accessible through the local area network. Although a SAN provides only block-level access, file systems built on top of SANs d

SAN Storage Engineer Jobs, Careers | Indeed.com

Because most storage manufactures have their own storage tools, which are not cheap so often storage engineers are fending for themselves with freeware, trialware or homemade scripts. Albeit storage vendors have gotten better over the years adding tools and dashboards, however, there are still gaps between brands that a good storage engineer will need to plug.
