Key Terms: entity theory, incremental theory. Self-Theories (Dweck) Carol Dweck (currently at Indiana University) describes a series of empirically-based studies that investigate how people develop beliefs about themselves (i.e., self-theories) and how these self-theories create their psychological worlds, shaping thoughts, feelings and behaviors [1]. The theories reveal why some students are motivated to work harder, and why others fall into patterns of helplessness and are self-defeating.
