Teleperm XP was developed by a separate division of Siemens, named Power Generation, dedicated to power plants. Teleperm XP is now called SPPA-T2000. The "normal" migration path from SPPA-T2000 is to SPPA-T3000, which supports the same basic power plant functionalities. You can find more information on the Power Generation division website.

Teleperm XP has a hotline which requires upfront payments as far as I know. Basically PG sell it as part of their service to power plants. This hotline service can be hit and miss - I know some field guys on the commissioning circuit who dont bother with the hotline service. I can direct your question to an ex Siemens colleague if you wish - throw it on the boards here.
