symptoms. It also includes a NEW color insert with 85 full-color photographs of toxic plants and of lesions associated with various poisonings. Written by respected veterinarian Michael E. Peterson and board-certified veterinary toxicologist Patricia A. Talcott, along with a team of expert contributors, this edition covers a wide variety of topics including toxicodynamics, toxicokinetics, effective history taking, recognizing clinical signs of toxic exposures, managing emergencies, and supportive care of the poisoned patient. Comprehensive coverage of toxins/poisons includes the full range of substances from acetaminophen to zinc, including home products, prescription medicines, recreational drugs, and more. Guidelines to evaluation, diagnosis and treatment include examinations of the source, toxic dose, toxicokinetics, clinical signs, minimum database, confirming tests, treatment progress and differential diagnosis for each specific toxicant. Coverage of common poisonous substances includes grapes and raisins, nicotine, mercury, mushrooms, Christmas-time plants, and snake and spider venoms. Toxicological Concepts section provides information on toxicologic principles such as history taking, providing supportive care, and managing emergency treatment. General Exposures section addresses nontraditional toxicology such as indoor environmental air, pesticides, pharmaceuticals, and toxicities in pregnant and lactating animals. Miscellaneous Toxicant Groups section covers commonly encountered specific toxicants, the proper use of diagnostic laboratories, use of human poison control centers, and antidotes for specific toxins. More than 50 international contributors provide up-to-date, authoritative advice on treating poisonings and intoxications. 8 NEW chapters cover topics including legal considerations in toxicology cases, responding to mass exposures, and poisonings in birds, small mammals, and geriatric patients. NEW color insert shows 85 of the most commonly encountered toxic substances for at-a-glance identification. UPDATED Signs and Symptoms index makes it easier to find information on a toxic agent by presenting signs rather than requiring the formulation of a diagnosis. UPDATED information on agents most likely to cause a

Providing a ready reference for the initial triage, collection of diagnostic samples, and management of a poisoning case, *Small Animal Toxicology Essentials* focuses on the most common poisons encountered by companion animals. From prevention to evaluation, monitoring, and treatment, the book is a guide for veterinary technicians to differentiate between significant and insignificant exposures and effectively manage animal poisonings. Emphasizing clinical signs, differential diagnoses, and case management, the book begins with the principles of veterinary toxicology, such as terminology, history-taking, and decontamination. The second half of the book is devoted to specific toxicants, including plants, metals, drugs, and household poisons. A companion website at www.wiley.com/go/poppenga provides review questions in Word and color images available for download into PowerPoint. *Small Animal Toxicology Essentials* is a useful resource for veterinary technicians, especially those with a interest in emergency and critical care, and veterinary technician students, as well as practicing veterinarians looking for an introduction to toxicology.

Blackwell's Five-Minute Veterinary Consult Clinical Companion: Small Animal Toxicology, Second Edition puts all the information needed to rapidly and accurately manage poisonings in small animal patients at the clinician's fingertips. Provides concise, bulleted information focused on the most important facts needed when treating a poisoned cat or dog Carefully organized for ease of use in an emergency, with important toxicants arranged alphabetically within categories Details clinically relevant information on the most common toxicants encountered by small animals Presents a wealth of color photographs to aid in plant identification Includes 14 new topics to this edition covering cyclosporine A, sleep aids, tacrolimus, bath salts, synthetic marijuana, poisonous lizards, imidacloprid, spring bulbs, and sodium monofluoroacetate

Small Animal Critical Care Medicine is a comprehensive, concise guide to critical care, encompassing not only triage and stabilization, but also the entire course of care during the acute medical crisis and high-risk period. This clinically oriented manual assists practitioners in providing the highest standard of care for ICU patients. More than 150 recognized experts offer in-depth, authoritative guidance on clinical situations from a variety of perspectives. Consistent, user-friendly format ensures immediate access to essential information. Organ-system, problem-based approach incorporates only clinically relevant details. Features state-of-the-art invasive and non-invasive diagnostic and monitoring procedures, as well as an extensive section on pharmacology. Appendices provide conversion tables, continuous rate infusion determinations, reference ranges, and more.

This book covers all aspects of toxicology, including toxic diseases of large animals, small animals, and exotic pets. It provides key information on how poisons affect the body, how the body responds to a foreign substance, how poisonings are diagnosed, and how poisonings are treated. Coverage includes every organ system of every

Bookmark File PDF Small Animal Toxicology E Book

species of animal with details on each body system's susceptibility to poison. Poisons affect animals differently depending on species, breed, age, gender, health status, and reproductive status. This resource addresses these differences, allowing the veterinarian to determine the class of toxicant, the mechanism of action, and the proper course of treatment. If confronted with an unknown poison, the information in this book will assist the veterinarian in formulating a list of potential poisons based on the clinical signs that the animal is exhibiting, and in choosing the appropriate tests to narrow the list to one or a few possible poisons. Most comprehensive toxicology book available
Written in a user-friendly style that makes it easy to master the content
Covers poisonings in both large and small domestic animals
The Principles of Toxicology section provides comprehensive coverage of concepts & terminology, toxicokinetics, treatments, and regulatory information
The Manifestations of Toxicoses section is devoted to differentiating between poisons based on lesions and clinical signs
The Classes of Toxicants section offers detailed information on each poison, including sources, risk factors, pathophysiology, clinical signs and lesions, diagnostic testing, and treatment
The author is board-certified in toxicology, and the contributors are all toxicologists and educators, ensuring authoritative, up-to-date clinical information

Veterinary Toxicology, 2nd edition is a unique single reference that teaches the basic principles of veterinary toxicology and builds upon these principles to offer an essential clinical resource for those practicing in the field. This reference book is thoroughly updated with new chapters and the latest coverage of topics that are essential to research veterinary toxicologists, students, professors, clinicians and environmentalists. Key areas include melamine and cyanuric acid, toxicogenomics, veterinary medical geology, toxic gases, toxicity and safety evaluation of new veterinary pharmaceuticals and much more. The 2nd edition of this popular book represents the collective wisdom of leading contributors worldwide and continues to fill an undeniable need in the literature relating to veterinary toxicology. New chapters

Bookmark File PDF Small Animal Toxicology E Book

covering important and timely topics such as melamine and cyanuric acid, toxicogenomics, toxic gases and veterinary medical geology
Expanded look at international topics, such as epidemiology of animal poisonings, regulatory guidelines and poisonous plants in Europe
Heavily contributed book with chapters written by qualified and well-experienced authorities across all areas of veterinary toxicology
Problem solving strategies are offered for treatment as well as in-depth knowledge of the basic mechanisms of veterinary toxicology

This time-saving, pocket-size guide offers a thorough understanding of toxicology that is essential to diagnosing and treating the complex problems resulting from toxin ingestion, a leading cause of morbidity and mortality in animals. The 2nd edition covers patient assessment and treatment techniques, as well as information on over 100 categories of toxic agents. Discussions of each agent include its uses, mechanism, pathophysiology, clinical signs, diagnosis, common products containing the agent, and acute and long-term treatment. A new avian section makes this edition even more comprehensive and clinically useful. Over 1,000 toxic agents are discussed, offering a thorough presentation of toxicology relevant to veterinary practice. An easy-to-use alphabetical organization with section tabs for quick reference makes information easy to locate in any setting. Detailed diagnostic and treatment information is presented in an appealing, visually accessible approach. A greater emphasis on the ingestion of human medications addresses this common concern in detail. Additional plant and chemical toxins are discussed to highlight potential poisonings seen in veterinary practice. A new avian section focuses on specific considerations for treating birds. Redesigned icons draw attention to important points and sections to improve the text's readability. A four-page, full-color insert features approximately 24 color photographs of poisonous plants for quick identification. All content has been reviewed by board-certified toxicologists to ensure that it is up-to-date and accurate. A second color throughout makes the icons more readable, the design more inviting, and critical
