Social Networks and Migration

Social networks affect many aspects of the migration process and play a significant role in migrants' lives. Interpersonal and organizational social ties affect who migrates and to which destinations, the kinds of employment migrants are able to obtain in host countries, and the extent to which migrants are able to remain connected with their homelands.

Migrant Social Networks: Vehicles for Migration ...

Therefore it is all that more fortunate that Harpviken's impressive new book *Social Networks and Migration in Wartime Afghanistan* offers a systematic and innovative analysis of war-time social networks that breaks new theoretical ground on which future scholars of political violence and migration will be able to build whether they focus on Afghanistan or other conflicts.

Social Networks and Migration in Wartime Afghanistan | K ...

differentials to life-cycle considerations and migration costs. In each of these factors, social networks play a prominent role. It is through social networks that migrants learn about opportunities and conditions in potential destinations; at home, the structure of migrants' social networks shapes their ability and desire to leave.

Migration and the Value of Social Networks

Relying on insights from the social networks theory and using qualitative data from two migrant sending regions and one migrant destination area in Ghana, this paper examines the role and effects of networks of social capital on migration processes and livelihood strategies of migrants in the construction and domestic work sectors in Accra, Ghana.

Social Networks, Migration Trajectories and Livelihood ...

While there is thus general consensus that social networks play an important role in migration decisions, the exact nature of this role is unclear. This ambiguity stems, at least in part, from a lack of reliable data on both migration and the structure of social networks. Migration is difficult to measure, particularly in developing countries where short-

Social Networks and Migration: Theory and Evidence from Rwanda

We establish a new set of stylized facts about the relationship between social networks and migration. Our results indicate that the average migrant derives more utility from 'interconnected' networks that provide social support than from 'expansive' networks that efficiently transmit information.

Migration and the value of social networks - Data ...

Migration researchers have long recognized that migratory processes do not occur in a vacuum; rather, they are embedded in social networks (e.g., Faist, 2000, Gold, 2001, Massey et al., 1993, Waldinger, 2004), and both migration and networks are embedded within wider international and national legislative, economic, political and social frameworks that structure the actions of individuals and the meanings they attach to them (e.g., Bilecen, 2014, Meyer et al., 1997, Pachucki and Breiger, 2010).

Social Networks and Migration: Far West Nepalese Labour ...

Two distinct mechanisms through which social networks provide utility to migrants are disambiguated: first, that networks provide migrants with access to information, for instance about jobs and conditions in the destination; and second, that networks act as a safety net for migrants by providing material or social support.

Migration and Social Networks: New Insights from Novel ...

The role of social media in the process of integration into a new country is of increasing significance to many migrants, as they maintain and exploit links to their countries of origin at the same time as making new connections in a host country, and as they seek to resist and subvert the ways in which they can be positioned in a host country.

Language, social media and migration

Social networks play a key role in mitigating the risks of migration, with migrants typically making use of network and kinship capital in the decision of whether to migrate and to which destination. This paper adds to the empirical literature on the role of networks in

While there is thus general consensus that social networks play an important role in migration decisions, the exact nature of this role is unclear. This ambiguity stems, at least in part, from a lack of reliable data on both migration and the structure of social networks. Migration is difficult to measure, particularly in developing countries where short-term migration is common and reliable household survey data is limited (McKenzie and

Social Networks and Migration

Social networks surrounding migrants and their significant others have important roles, for example, in supporting each other during finding accommodation, employment, and education places. Local and transnational networks also play a major role in migrants' well-being through providing emotional support and an environment for belonging.

Drawing on fieldwork in the Herat area, Afghanistan, this book addresses migration patterns throughout three decades of war. It launches a framework for understanding the role of social networks for people's responses to war and disaster as well as mobilizing or maintaining material resources for security and gathering information.

In an important new application of sociological theories, Nadia Y. Flores-Yeffal offers fresh insights into the ways in which social networks function among immigrants who arrive in the United States from Mexico without legal documentation. She asks and examines important questions about the commonalities and differences in networks for this group compared with other immigrants, and she identifies "trust" as a major component of networking among those who have little if any legal protection. Revealing the complexities

behind social networks of international migration, *Migration-Trust Networks: Social Cohesion in Mexican US-Bound Emigration* provides an empirical and theoretical analysis of how social networks of international migration operate in the transnational context. Further, the book clarifies how networking creates chain migration effects observable throughout history. Flores-Yeffal's study extends existing social network theories, providing a more detailed description of the social micro- and macrodynamics underlying the development and expansion of social networks used by undocumented Mexicans to migrate and integrate within the United States, with trust relationships as the basis of those networks. In addition, it incorporates a transnational approach in which the migrant's place of origin, whether rural or urban, becomes an important variable. *Migration-Trust Networks* encapsulates the new realities of undocumented migration from Latin America and contributes to the academic discourse on international migration, advancing the study of social networks of migration and of social networks in general.

The growing importance of immigration in the United States today prompted this examination of the adequacy of U.S. immigration data. This volume summarizes data needs in four areas: immigration trends, assimilation and impacts, labor force issues, and family and social networks. It includes recommendations on additional sources for the data needed for program and research purposes, and new questions and refinements of questions within existing data sources to improve the understanding of immigration and immigrant trends.

This book examines the experiences of transient migrants in the Asia-Pacific, and in so doing provides new ways of understanding diversity. By focusing on the transient destination hubs of Australia and Singapore, Catherine Gomes shifts our thinking about diversity for two disruptive reasons: the increasingly large and global transient flows of people and our everyday reliance on digital media. The unprecedented usage of digital media influences not only communication patterns and information-seeking behaviour, but has also led to the rapid evolution of the very nature of entertainment and news, and directly impacted on our documenting and mapping of self (e.g. posts of photographs, opinions and links on social media timelines). The book introduces readers to the concept of siloed diversity - a phenomenon which occurs when people rely on a hierarchy of identities developed while in transience to make connections and disconnections with others.

Focusing mainly on the European experience including Eastern Europe, this important volume offers an advanced introduction to immigrant incorporation studies from a historical, empirical and theoretical perspective. Beyond incorporation theories, renowned scholars in the field explore incorporation in action in different fields, policy issues and normative dimensions.

Focusing on the case of the Hazaras, a population from central Afghanistan, this book shows how migration studies and transnationalism are at the heart of theoretical and methodological debates which animate anthropology.

"Lisa DiCarlo offers us new insights into the study of identity and migration. She draws on research and the history of the Black Sea region going back to the early years of the modern Turkish Republic, to explain current Turkish labour migration trends." "DiCarlo argues current transnational chain migration from the Black Sea area is led by regional identity over ethnicity, as this strong bond leads Turkish migrants from the Black Sea region to follow Greek Black Sea migrants across the Atlantic, rather than join their Turkish compatriots in Europe." "DiCarlo shows us how a diaspora community survives through an emerging transnational community. This is essential reading for those wanting to understand transnational migration and identity in today's global community."--Jacket.

Using immigrants' own words, Bashi shows how immigrants organize social networks that offer mutual financial and emotional support and help an entire ethnic group navigate systems of socioeconomic stratification.
