Written and reviewed by students, residents, and experts, and led by bestselling review author Dr. Ted O’Connell, Crush Step 1, 2nd Edition, is the perfect review resource you need to score high on this high-stakes exam. This comprehensive, focused resource is the most effective review tool available for truly understanding the material on which you’ll be tested. Up-to-date, easy-to-read, high-yield coverage of all the material tested on the exam. Numerous color images, helpful lists, and quick-reference tables help students retain and recall information quickly. Review questions for each chapter test student mastery of core knowledge and aid retention of high-yield facts. Test prep strategies help readers identify and understand question stems rather than memorizing buzz words. A new review board of current students and residents, as well as authors who scored within the 99th percentile on the USMLE Step 1, ensures relevance and accuracy.

After ten years since his last best-selling book, Dan Lok, founder of Closers.com is finally unveiling his new book! In Unlock It, you'll find the strategies and methods Dan used personally to go from being a poor immigrant boy with \$150,000 debt to becoming a global social phenomenon and the leader of the largest virtual closing organization in the world. If you are struggling financially, you'll learn how to develop skills not taught in schools that will increase your income and Financial Confidence. If you are building or leading an organization, you'll get an inside look at how Dan Lok strategically scaled his organization through a combination of digital media and Social Capital, High-Ticket Closers and an unbeatable team culture. Wherever you are, Unlock It will show you how to find your own way to achieving wealth, success and significance.

Triple-crown winner of mystery’s most coveted awards—the Edgar, the Anthony, and the Shamus—Rick Riordan and his Texas-style take on the crime novel have never been bigger or darker than in this latest Tres Navarre thriller. This time Navarre faces a killer as unstoppable as a force of nature. Tres Navarre had given up private investigation—and with it a violent past that had buried too many friends. Newly married, with a baby on the way, it was time to find a safer line of work. He and Maia had come to Rebel Island to celebrate their honeymoon and a new future. But no sooner had they arrived than a reminder of the past showed up in the form of a corpse shot dead in room 12. Just like that Tres finds himself flashing back on the memory of a grim childhood summer spent on the island—a summer that changed everything in his life. A summer he could never forget but never entirely remember either. And when a second corpse turns up, it’s clear to Tres that the past is not dead and buried after all, but is stalking Rebel Island with unfinished business of its own. What really happened that long-ago summer, what dark secrets were kept, and who has come back to avenge them...these are the questions Tres, his brother Garrett, and the very pregnant Maia must answer—and time is running out. For a monster hurricane is about to hit Rebel Island, cutting them off from the mainland and leaving them trapped on a flooding island with the hotel’s remaining guests brutally dying one by one. Tres knows better than anyone that the bloodlines of South Texas are as twisted as barbed wire. This time they’re guarding a revelation that can turn his dreams of happily ever after into the ultimate nightmare.

This text examines the concept of cosmetology and developments in surgical and clinical techniques in cosmetic skin care.

Modern architecture is not a new branch of an old tree: it is an altogether new shoot rising beside the old roots. Thus Walter Gropius, one of the pioneers of modern architecture, on the radical departures of the 20th century. In the 1930s, the term International Style came into use to describe a new form of architecture evolved from Bauhaus and its conviction that ""form follows function."" Until the 1980s, International Style set the standard in modern building, with its rational solutions to construction problems. Combining steel, glass and concrete, it established an aesthetic founded on the sheer thrill of pushing to the limits of technical and economic viability. Hence the exhilarating skylines of metropolises worldwide; but also the desolate anonymity of modern suburban environments. This book traces the exciting evolution of a style while examining the individual and regional forms it took, and analyses the ideals and realities of architectural visions of utopia.

???????? Wilfried Martens is one of the most distinguished politicians to come from Belgium in the last ffty years. In his long poli- cal career, he has always fought for the implementation of his goals with passion and deep conviction. What has to be mentioned frst in this context is his s- cessful advocacy of federalism in his home country, Belgium. Already in his time as chair of the CVP youth league from 1967 to 1972, groundbreaking manifestos on Belgium’s federali- tion were written under his auspices. Later on, as President of the CVP, he succeeded in negotiating the Egmont Pact, whose essential elements form part of today’s federal Belgian C- stitution. He served as Prime Minister for more than a decade, and in this role he convinced the regions and linguistic groups of his country, which were often at odds with each other, of the necessity for cooperation and solidarity.

Oxidative Stress and Antioxidant Protection: The Science of Free Radical Biology and Disease Oxidative Stress and Antioxidant Protection begins with a historical perspective of pioneers in oxidative stress with an introductory section that explains the basic principles related to oxidative stress in biochemistry and molecular biology, demonstrating both pathways and biomarkers. This section also covers diagnostic imaging and differential diagnostics. The following section covers psychological, physiologic, pharmacologic and pathologic correlates. This section addresses inheritance, gender, nutrition, obesity, family history, behavior modification, natural herbal-botanical products, and supplementation in the treatment of disease. Clinical trials are also summarized for major medical disorders and efficacy of treatment, with particular focus on inflammation, immune response, recycling, disease progression, outcomes and interventions. Each of the chapters describes what biomarker(s) and physiological functions may be relevant to a concept of specific disease and potential alternative therapy. The chapters cover medical terminology, developmental change, effects of aging, senescence, lifespan, and wound healing, and also illustrates cross-over exposure to other fields. The final chapter covers how and when to interpret appropriate data used in entry level biostatistics and epidemiology. Authored and edited by leaders in the field, Oxidative Stress and Antioxidant Protection will be an invaluable resource for students and researchers studying cell biology, molecular biology, and biochemistry, as well professionals in various health science fields.

Dr. Shinya again changes our view of what is possible in his groundbreaking new book, the Rejuvenation Enzyme. Here Dr. Shinya turns his visionary genius to solving the problem of aging cells. His conclusions will amaze you with their simplicity and insight as he shows you how you can create your own rejuvenation plan using techniques such as the Little Fast, detox massage, coffee enema and Kangen water. In The Rejuvenation Enzyme you will learn: How rejuvenation enzymes transform zombie cells into healthy cells. How you can restore energy by clearing ôgarbageô from your cells Why purple food improves your memory How drinking Kangen Water supports you health and energy Why turmeric may prevent Alzheimer’s Disease Dr. Hiromi Shinya, medical pioneer and inventor, developed the now standard technique of non-invasive colonoscopic surgery. In his more than 50 years of practice he was a professor of surgery at Albert Einstein College of Medicine and Head of the Endoscopic Center of Beth Israel Hospital in New York as well as an adviser for Maeda Hospital and Hanzomon Gastrointestinal Clinic in Japan. He was also vice-chairman of the Japanese Medical Association in the USA. Book jacket.

Cosmetic science covers the fields from natural sciences to human and social sciences, and is an important interdisciplinary element in various scientific disciples. New Cosmetic Science is a completely updated comprehensive review of its 35 year old counterpart Cosmetic Science. New Cosmetic Science has been written to give as many people as possible a better understanding of the subject, from scientists and technologists specializing in cosmetic research and manufacturing, to students of cosmetic science, and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science, and cosmetics, is described in Part I. In addition to discussing the safety of cosmetics, the "Usefulness of Cosmetics", rapidly becoming an important theme, is described using research examples. The latest findings on cosmetic stability are presented, as are databases, books and magazines, increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint, including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics, and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance, types, main components, prescriptions and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage, but indicates future progress enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties (cosmeceuticals), working both physically and psychologically, are also highlighted.

Scientific Elite is about Nobel prize winners and the well-defined stratification system in twentieth-century science. It tracks the careers of all American laureates who won prizes from 1907 until 1972, examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra-elite in science. The study draws on biographical and bibliographical data on laureates who did their prize-winning research in the United States, and on detailed interviews with forty-one of the fifty-six laureates living in the United States at the time the study was done. Zuckerman finds laureates being successively advantaged as time passes. These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards, which create and maintain a sharply graded stratification system.
