Teaching Tolerance provides free resources to educators—teachers, administrators, counselors and other practitioners—who work with children from kindergarten through high school. Educators use our materials to supplement the curriculum, to inform their practices, and to create civil and inclusive school communities where children are respected, valued and welcome participants.

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals * What poverty is and how it affects students in school; * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and * How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

In this galvanizing follow-up to the best-selling *Teaching with Poverty in Mind*, renowned educator and learning expert Eric Jensen digs deeper into engagement as the key factor in the academic success of economically disadvantaged students. Drawing from research, experience, and real school success stories, *Engaging Students with Poverty in Mind* reveals * Smart, purposeful engagement strategies that all teachers can use to expand students' cognitive capacity, increase motivation and effort, and build deep, enduring understanding of content. * The (until-now) unwritten rules for engagement that are essential for increasing student achievement. * How automating engagement in the classroom can help teachers use instructional time more effectively and empower students to take ownership of their learning. * Steps you can take to create an exciting yet realistic implementation plan. Too many of our most vulnerable students are tuning out and dropping out because of our failure to engage them. It's time to set the bar higher. Until we make school the best part of every student's day, we will struggle with attendance, achievement, and graduation rates. This timely resource will help you take

Children of low socioeconomic status often enter school with poor skills, leading them to be misidentified as learning disabled. Educators in Grades K–12 can allocate resources for special education services more effectively and meet the needs of low SES students by preventing students from being placed in the wrong program and by providing readiness supports. Offering an in-depth look at schools that have realized effective results in remarkable time frames, the authors challenge educators and parents to consider how low expectations can affect student achievement—and emphasize optimism as a necessary tenet of schools' day-to-day teaching/learning programs and school-community relationships. This resource provides: Training resources for teaching low SES students Assessment tools for identifying learning needs Strategies for building relationships of trust and collaboration throughout the school community Data charts that illustrate the increase in student achievement from schoolwide initiatives A bibliography and glossary of pertinent research and terminology With these strategies and tools, schools can meet the developmental and environmental needs of their most vulnerable students and watch student achievement and confidence soar!

When the first edition of *Teaching with the Brain in Mind* was published in 1998, it quickly became an ASCD best-seller, and it has gone on to inspire thousands of educators to apply brain research in their classroom teaching. Now, author Eric Jensen is back with a completely revised and updated edition of his classic work, featuring new research and practical strategies to enhance student comprehension and improve student achievement. In easy to understand, engaging language, Jensen provides a basic orientation to the brain and its various systems and explains how they affect learning. After discussing what parents and educators can do to get children's brains in good shape for school, Jensen goes on to explore topics such as motivation, critical thinking skills, optimal educational environments, emotions, and memory. He offers fascinating insights on a number of specific issues, including * How to tap into the brain's natural reward system. * The

value of feedback. * The importance of prior knowledge and mental models. * The vital link between movement and cognition. * Why stress impedes learning. * How social interaction affects the brain. * How to boost students' ability to encode, maintain, and retrieve learning. * Ways to connect brain research to curriculum, assessment, and staff development. Jensen's repeated message to educators is simple: You have far more influence on students' brains than you realize . . . and you have an obligation to take advantage of the incredible revelations that science is providing. The revised and updated edition of Teaching with the Brain in Mind helps you do just that.

Empower students with proven strategies for brain-friendly instruction! This revised fourth edition offers more than 1,000 brain research–based teaching strategies along with reflections, affirmations, sidebars, bulleted lists, quotable quotes, and a wealth of instructional tools. The author shows how to improve instructional effectiveness, plan standards-based lessons, and optimize student learning with practical techniques such as: Matching instruction with learners' developmental stages Responding to unique learning styles with differentiated techniques Using assessment as part of instruction Addressing the learning needs of students in poverty Managing students' emotions with music and energizers Practicing positive teaching mind-sets to enhance student results

Regenia Rawlinson shares compelling details from her own poverty-stricken childhood and how her own experiences shaped her mindset and what she had to do (and is doing) to make her personal transcending journey. This ground-breaking book outlines ten of the ideas that contributed to the mind-set she adopted while living in poverty and their lifelong threat is a must read for anyone born, grew up, or living in poverty. Social service workers, pastors, community leaders, educators, and other individuals working with people living in poverty will find this book an invaluable resource. Rawlinson explores why this mindset is so destructive and how to transcend it to move from poverty to prosperity.

Learn a four-step research-based program for differentiating instruction based on the cultural needs, beliefs, and values of diverse learners. The authors show you how to build teacher background knowledge; plan for differentiation; and differentiate context, content, process, product, and assessment. This book provides an opportunity for the education community to engage students at risk whom our schools have often failed.
