David Stifter ' s Sengoidelic (SHAN-goy-thelg) provides a comprehensive introduction to Old Irish grammar and metrics. As an introductory text to the Irish language spoken around the eighth century C.E., this essential volume, covering all aspects of the grammar in a clear and intuitive format, is ideally suited for use as a course book or as a guide for the independent learner. This handbook also will be an essential reference work for students of Indo-European philology and historical linguistics. Stifter leads the novice through the idiosyncrasies of the language, such as initial mutations and the double inflection of verbs. Filled with translation exercises based on selections from Old Irish texts, the book provides a practical introduction to the language and its rich history. Sengoidelic opens the door to the fascinating world of Old Irish literature, famous not only for the Táin Bó Cúailnge (The Cattle Raid of Cúailnge) and its lyrical nature poetry but also as a major source for the political and legal history of Ireland. Stifter ' s step-by-step approach and engaging style make his book an ideal tool for both the self taught individual and the classroom environment. It will be of interest to beginning students of Old and Middle Irish, to scholars of Irish history, Celtic culture, and comparative linguistics, and to readers of Irish literature.

First published by the Clarendon Press in 1961, this authoritative work is based largely on the edicts of Asoka, whose policies are analysed against the background of Mauryan civilization during the third and fourth centuries BC. This is a thoroughly revised edition, with a substantial new afterword by the author, a revised bibliography and index, and a map showing new archaeological sites.

Enhance Fundamental Value and Establish Competitive Advantage with Leadership Agility Whether you ' re leading an organization, a team, or a project, Stand Back and Deliver gives you the agile leadership tools you ' ll need to achieve breakthrough levels of performance. This book brings together immediately usable frameworks and step-by-step processes that help you focus all your efforts where they matter most: delivering business value and building competitive advantage. You ' ll first discover how to use the authors ' Purpose Alignment Model to make better up-front decisions about where to invest limited resources—and how to filter out activities that don ' t drive market leadership. Next, you ' ll learn how to collaborate in new ways that unleash your organization ' s full talents for innovation. The authors offer the Context Leadership Model for understanding the unique challenges of any project, and they help you tailor your leadership approach to address them. You ' ll find a full chapter on organizing information to promote more effective, value-driven decision-making. Finally, drawing on decades of experience working with great leaders, the authors focus on a critical issue you ' ll face over and over again: knowing when to step up and lead, and when to stand back and let your team produce results. Coverage includes Effectively evaluating, planning, and implementing large system projects Reducing resistance to process improvements Bringing greater agility to the way you manage products, portfolios, and projects Identifying the tasks that don ' t create enough value to be worth your time Developing the forms of collaboration that are crucial to sustaining innovation Mitigating project risks more effectively—especially those associated with complexity and uncertainty Refocusing all decision-making on delivering value to the organization and the marketplace Making decisions at the right time to leverage the best information without stifling progress

The TCP/IP protocol suite has become the de facto standard for computer communications in today's networked world. The ubiquitous implementation of a specific networking standard has led to an incredible dependence on the applications enabled by it. Today, we use the TCP/IP protocols and the Internet not only for entertainment and information, but to conduct our business by performing transactions, buying and selling products, and delivering services to customers. We are continually extending the set of applications that leverage TCP/IP, thereby driving the need for further infrastructure support. It is our hope that both the novice and the expert will find useful information in this publication.
