Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he

documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

Diana Butler Bass, one of contemporary Christianity's leading trend-spotters, exposes how the failings of the church today are giving rise to a new "spiritual but not religious" movement. plays in our lives and our interactions For all the thousands of books that have been written about religion, few until this one have attempted to examine it scientifically: to ask why—and how—it has shaped so many lives so strongly. Is religion a product of blind evolutionary instinct or rational choice? Is it truly the best way to live a moral life? Ranging through biology, history, and psychology, Daniel C. Dennett charts religion's evolution from "wild" folk belief to "domesticated" dogma. Not an antireligious screed but an unblinking look beneath the veil of orthodoxy, *Breaking the Spell* will be

"A superbly argued book." –Richard Dawkins, author of *The God Delusion* The New York Times bestselling author of *Why Evolution is True* explains why any attempt to make religion compatible with science is doomed to fail In this provocative book, evolutionary biologist Jerry A. Coyne lays out in clear, dispassionate detail why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to

incorrect, untestable, or conflicting conclusions. Coyne is responding to a national climate in which more than half of Americans don't believe in evolution, members of Congress deny global warming, and long-conquered childhood diseases are reappearing because of religious objections to inoculation, and he warns that religious prejudices in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable "truth" by subjecting those claims

to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in. At the dawn of the new atheist movement, the thinkers who became known as "the four horsemen," the heralds of religion's unraveling—Christopher Hitchens, Richard Dawkins, Sam Harris, and Daniel Dennett—sat down together over cocktails. "a city upon a hill," Americans' role in the world has been shaped by their belief that God has something special in mind for them. But this is a story that historians have mostly ignored. Now, in the first authoritative work on the subject, Andrew Preston explores the major strains of religious fervor—liberal and conservative, pacifist and militant, internationalist and isolationist—that framed American thinking on international issues from the earliest colonial wars to the twenty-first century. He arrives at some startling conclusions, among them: Abraham Lincoln's use of religion in

the Civil War became the model for subsequent wars of humanitarian intervention; nineteenth-century Protestant missionaries made up the first NGO to advance a global human rights agenda; religious liberty was the centerpiece of Franklin Roosevelt's strategy to bring the United States into World War II. From George Washington to George W. Bush, from the Puritans to the present, from the colonial wars to the Cold War, religion has been one of America's most powerful sources of ideas about the wider world. When, just days after 9/11, George W. Bush described America as "a prayerful nation, a nation that prays to an

almighty God for protection and for peace," or when Barack Obama spoke of balancing the "just war and the imperatives of a just peace" in his Nobel Peace Prize acceptance speech, they were echoing four hundred years of religious rhetoric. Preston traces this echo back to its source. *Sword of the Spirit, Shield of Faith* is an unprecedented achievement: no one has yet attempted such a bold synthesis of American history. It is also a remarkable work of balance and fair-mindedness about one of the most fraught subjects in America.
