Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to

Research indicates that  
for most youth, the  
period of risky

identity becomes settled  
with maturity. Much  
adolescent involvement

biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes.

Accordingly adolescents lack mature capacity for self-regulations because
