The Human Use of Human Beings is a book by Norbert Wiener, the founding thinker of cybernetics theory and an influential advocate of automation; it was first published in 1950 and revised in 1954. The text argues for the benefits of automation to society; it analyzes the meaning of productive communication and discusses ways for humans and machines to cooperate, with the potential to amplify human power and release people from the repetitive drudgery of manual labor, in favor of more creative pu

The Human Use of Human Beings - Wikipedia

Despite its existence well before its time, "The Human Use of Human Beings" stands as a great precursor to both information technology and media theory. Analogies fly back and forth throughout the first half of the book, between human individuals, societal systems and machines.

xii THE HUMAN USE OF HUMAN BEINGS penetrating and innovative mind to identifying and elaborat ing on a relation of high technology to people which is benign or, in his words, to the human - rather than the inhuman - use of human beings. In doing so during the years when the cold war was raging in the United States, he found an

IAN BEINGS - Monoskop

Only a few books stand as landmarks in social and scientific upheaval. Norbert Wiener's classic is one in that small company. Founder of the science of cybernetics—the study of the relationship between computers and the human nervous system—Wiener was widely misunderstood as one who advocated the automation of human life. As this book reveals, his vision was much more complex and interesting.

The Human Use Of Human Beings: Cybernetics And Society ...

You may have heard that humans only use 10 percent of their brain power, and that if you could unlock the rest of your brainpower, you could do so much more. You could become a super genius, or acquire psychic powers like mind reading and telekinesis. However, there is a powerful body of evidence debunking the 10 percent myth.

What Percentage of the Human Brain Is Used?

Most people would either say: (a) "The human is a social animal", using "the human" here to refer to an example member of the group. Or (b) "Humans are social animals". Personally that's what I'd say. "A human ..." is also acceptable, but I think would be less common. The uncountable-noun form of "human" is "humanity".

International Commission on the Clinical Use of Human ...

Human shields are legally protected persons—either civilians or prisoners of war—who are either coerced or volunteer to deter attacks by occupying the space between a belligerent and a legitimate military target. The use of human shields is forbidden by Protocol I of the Geneva Conventions. It is also a specific intent war crime as codified in the Rome Statute, which was adopted in 1998. The language of the Rome Statute prohibits "utilizing the presence of a civilian or other protected ...

Human shields (law) - Wikipedia

Use of human shields is among the most pernicious tactics employed on the modern battlefield. U.S., Israeli, and other allied armed forces have repeatedly been confronted with human-shields use by terrorist organizations, including al-Qaeda, Hamas, Hezbollah, and the Islamic State. Terrorists hide behind human shields in order to (a) cause ...
