The present age is a rant on the change of times and the ideas in it matter even more today. Kierkegaard here talks about the loss of passion. loss of passion leading to indolence and the lack of action. Loss of individuality and the rise of mob mentality. It is an age of advertisement, an age of publicity.

The Present Age (1846) The present age is one of understanding, of reflection, devoid of passion, an age which flies into enthusiasm for a moment only to decline back into indolence. Not even a suicide does away with himself out of desperation, he considers the act so long and so deliberately, that he kills himself with thinking -- one could barely call it suicide since it is thinking which takes his life.

Kierkegaard argues the present age drains the meaning out of ethical concepts through passionless indolence. The concepts are still used, but are drained of all meaning by virtue of their detachment from a life view which is passion-generated and produces consistent action.

~~The Present Age On The Death Of Rebellion~~

The Present Age is a stellar entry in the genre of anti-modern manifesto, an early landmark in the still far-from-exhausted intellectual backlash against democracy, science, and unbelief. Kierkegaard did not get around to railing at democracy or science very much - he died too young - but his hostility to secular rationalism was implacable, and far more subtle than that of most other defenders of religious faith.

A part of Harper Perennial's special "Resistance Library" highlighting classic works that illuminate the "Age of Trump": Soren Kierkegaard's stunningly prescient essay on the dangers of mass media—particularly advertising, marketing, and publicity. An essential read as we reckon with, and try to understand, the media forces that have helped create our present political moment. "The Present Age shows just how original Kierkegaard was. He brilliantly foresaw the dangers of the lack of commitment and responsibility in the Public Sphere. When everything is up for endless detached critical comment as on blogs and cable news, action finally becomes impossible."— Hubert L. Dreyfus, University of California, Berkeley "A revolutionary age is an age of action; ours is the age of advertisement and publicity.

Nothing ever happens but there is immediate publicity everywhere."— From The Present Age In The Present Age (1846), Søren Kierkegaard analyzes the philosophical implications of a society dominated by the mass-media. What makes the essay so remarkable is the way it seems to speak directly to our time—i.e. the Information Age—where life is dominated by mere “information” not true “knowledge.” Kierkegaard even goes so far as to say that advertising and publicity almost immediately co-opts and suppresses revolutionary actions/thoughts. The Present Age is essential reading for anyone who wishes to better understand the modern world.

"Those who would know Kierkegaard, the intensely religious humorist, the irrepressibly witty critic of his age and ours, can do no better than to begin with this book. [In it] we find the heart of Kierkegaard. It is not innocuous, not genteel, not comfortable. He does not invite the reader to relax and have a little laugh with him at the expense of other people or at his own foibles. Kierkegaard deliberately challenges the reader's whole existence. "Nor does he merely challenge our existence; he also questions some ideas that had become well entrenched in his time and that are even more characteristic of the present age. Kierkegaard insists, for example, that Christianity was from the start essentially authoritarian—not just that the Catholic Church was, or that Calvin was, or Luther, or, regrettably, most of the Christian churches, but that Christ was—and is. Indeed, though Kierkegaard was, and wished to be, an individual, and even said that on his tombstone he would like no other epitaph than 'That Individual,' his protest against his age was centered in his lament over the loss of authority." --Walter Kaufman, in the Introduction

Examines the effects of television culture on how we conduct our public affairs and how "entertainment values" corrupt the way we think.

When his teenaged son Christopher, brain-damaged in an auto accident, developed a 106-degree fever following weeks of unconsciousness, John Campbell asked the attending physician for help. The doctor refused. Why bother? The boy's life was effectively over. Campbell refused to accept this verdict. He demanded treatment and threatened legal action. The doctor finally relented. With treatment, Christopher's temperature subsided almost immediately. Soon afterwards he regained consciousness and today he is learning to walk again. This story is one of many Wesley Smith recounts in his groundbreaking new book, *The Culture of Death*. Smith believes that American medicine "is changing from a system based on the sanctity of human life into a starkly utilitarian model in which the medically defenseless are seen as having not just a 'right' but a 'duty' to die." Going behind the current scenes of our health care system, he shows how doctors withdraw desired care based on Futile Care Theory rather

than provide it as required by the Hippocratic Oath. And how ''bioethicists'' influence policy by considering questions such as whether organs may be harvested from the terminally ill and disabled. This is a passionate, yet coolly reasoned book about the current crisis in medical ethics by an author who has made ''the new thanatology'' his consuming interest.

Who might reasonably be nominated as the funniest philosopher of all time? With this anthology, Thomas Oden provisionally declares Søren Aabye Kierkegaard (1813-1855)--despite his enduring stereotype as the melancholy, despairing Dane--as, among philosophers, the most amusing. Kierkegaard not only explored comic perception to its depths but also practiced the art of comedy as astutely as any writer of his time. This collection shows how his theory of comedy is integrated into his practice of comic perception, and how both are integral to his entire authorship. Kierkegaard's humor ranges from the droll to the rollicking; from farce to intricate, subtle analysis; from nimble stories to amusing aphorisms. In these pages you are invited to meet the wife of an author who burned her husband's manuscript and a businessman who, even with an abundance of calling cards, forgot his own name. You will hear of an interminable vacillator whom archeologists found still pacing thousands of years later, trying to come to a decision. Then there is the emperor who became a barkeeper in order to stay in the know. The Humor of Kierkegaard is for anyone ready to be amused by human follies. Those new to Kierkegaard will discover a dazzling mind worth meeting. Those already familiar with his theory of comedy will be delighted to see it concisely set forth and exemplified. Others may have read Kierkegaard intensively without having ever really noticed his comic side. Here they will find what they have been missing.

Man is spirit. But what is spirit? Spirit is the self. But what is the self? The self is a relation which relates itself to its own self, or it is that in the relation [which accounts for it] that the relation relates itself to its own self; the self is not the relation but [consists in the fact] that the relation relates itself to its own self. Man is a synthesis of the infinite and the finite, of the temporal and the eternal, of freedom and necessity; in short, it is a synthesis.

Estimation of the Time Since Death remains the foremost authoritative book on scientifically calculating the estimated time of death postmortem. Building on the success of previous editions which covered the early postmortem period, this new edition also covers the later postmortem period including putrefactive changes, entomology, and postmortem r

the familiar collective destiny of the human race to the modern tendency, so pronounced in industrial societies, to hide death as if it were an embarrassing family secret. -- Newsweek

When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. Approaching Death reflects a wide-ranging effort to understand what we know about care at the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. Approaching Death considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role of practice guidelines, cost concerns, and legal issues such as assisted suicide. The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom "nothing can be done."

WINNER OF THE NATIONAL BOOK AWARD In 1964, Jonathan Kozol entered the Boston Public School system to teach fourth grade at one of its most overcrowded inner-city schools. Here, he unflinchingly exposes the disturbing "destruction of hearts and minds in the Boston public school." Death at an Early Age is the unsparring, heart-wrenching account of the year he spent there—the most shocking and powerful personal story ever told by a young teacher, now updated with a new epilogue by the author. "Honest and terrifying... the heartbreaking story it tells has to be read."—Robert Coles, The New York Times Book Review "Will anger you to the boiling point and may make you want to weep... I recommend—with considerable urgency—Death at an Early Age."—Chicago Tribune
