The Oxford Handbook of Music and Advertising is an essential guide to the crucial role that music plays in relation to the audio or audiovisual advertising message, from the perspectives of its creation, interpretation, and reception. The book's unique three-part organization reflects this life cycle of an advertisement, from industry inception to mass-mediated text to consumer behaviour. Experts well versed in the practice, analysis, and empirical studies of the commercial message have contributed to the collection's forty-two chapters, which collectively represent the most ambitious and comprehensive attempt to date to address the important intersections of music and advertising. Handbook chapters are self-contained yet share borders with other contributions within a given section and across the major sections of the book, so readers can either study one topic of particular interest or read through to gain an understanding of the broader issues at stake. Within the book's Introduction, each editor has provided an overview of the unifying themes for the section for which they were responsible, with brief summaries of individual contributions at the beginnings of the sections. The lists of recommended readings at the end of chapters are intended to assist readers in finding further literature about the topic. An overview of industry practices by a music insider is provided in the Appendix, giving context for the three parts of the book.

This Prius repair manual contains the essential information and know-how you need to take the mystery out of servicing the Toyota Prius with Hybrid Synergy Drive®. You ll find step-by-step directions from safely disabling the high voltage system to real-world practical repair and maintenance procedures and full-color technical training. Model and engine coverage: 2004 - 2008 Prius NHW20 and 1NZ-FXE Engines.

Written by the world's leading scholars and researchers in the emerging field of sound studies, The Oxford Handbook of Sound Studies offers new and fully engaging perspectives on the significance of sound in its material and cultural forms. The book considers sounds and music as experienced in such diverse settings as shop floors, laboratories, clinics, design studios, homes, and clubs, across an impressively broad range of historical periods and national and cultural contexts. Science has traditionally been understood as a visual matter, a study which has historically been undertaken with optical technologies such as slides, graphs, and telescopes. This book questions that notion powerfully by showing how listening has contributed to scientific practice. Sounds have always been a part of human experience, shaping and transforming the world in which we live in ways that often go unnoticed. Sounds and music, the authors argue, are embedded in the fabric of everyday life, art, commerce, and politics in ways which impact our perception of the world. Through an extraordinarily diverse set of case studies, authors illustrate how sounds -- from the sounds of industrialization, to the sounds of automobiles, to sounds in underwater music and hip-hop, to the sounds of nanotechnology -- give rise to new forms listening practices. In addition, the book discusses the rise of new public problems such as noise pollution, hearing loss, and the "end" of the amateur musician that stem from the spread and appropriation of new sound- and music-related technologies, analog and digital, in many domains of life. Rich in vivid and detailed examples and compelling case studies, and featuring a companion website of listening samples, this remarkable volume boldly challenges readers to rethink the way they hear and understand the world.

This book traces the full history of noise in and around cars, shows how we created auditory privacy in our cars. It is about the sounds of car engines, tires, wipers, blinkers, warning signals, in-car audio systems and, ultimately, about how we became used to listen while driving.

"If Lee Harvey Oswald did it, he could not have done it alone. If he did not, he must be the hit of the century. If he was involved and somehow double-crossed, alive today must be persons with the guilt of awful silence." Dallas, Texas. 12.30pm. Friday, 22 November 1963. President John F. Kennedy is assassinated. 48 hours later, Lee Harvey Oswald himself was murdered. Told through the eyes of Oswald's wife and mother, coupled with extracts from the Warren Commission's report, we follow the unsettled drifting life of Lee Harvey Oswald - his loveless marriage to his Russian wife, his challenging relationship with his mother and his pathological hatred of Kennedy's life and achievements. Oswald had the means, motive and opportunity, but did he even do it? Could a man who never did anything on his own murder a President?

A title in the Emerging Issues in Analytical Chemistry series, Particulates Matter: Impact, Measurement, and Remediation of Airborne Pollutants provides the latest technical findings in the study of particulate matter (PM). It links these findings to awareness-raising and actionable schemes for legislated remediation and engineered solutions. Written in an engaging and informative manner, the book begins with a multi-disciplinary overview of the major sources and unique classes of PM, detection techniques, and their impact, including molecular changes resulting in health effects. It then goes one step further by proposing and examining the means to curtail and contain PM generation and ameliorate their impacts. Particulates Matter: Impact, Measurement, and Remediation of Airborne Pollutants offers a high-quality reference guide to PM that will greatly benefit technology leaders in environmental compliance groups, epidemiologists and other public health professionals focused on pollution and health, and researchers and scholars working in pollution, climate change, and urbanization. It may also be useful to advanced undergraduate and early graduate students in environmental sciences. Includes a summary of the current knowledge on nanoparticles as pollutants and their negative health effects Provides a framework for the evolution and maturation of air pollution characterization and mitigation Describes an integrated set of engineered solutions that account for the concatenated relationships between technology, policy, and society necessary for long-term success

The social sciences have been heavily influenced by modernization theory, focusing on issues of economic growth, political development and social change, in order to develop a predictive model of linear progress for developing countries following a Western prototype. Under this hegemonic paradigm of development the world tends to get divided into simplistic binary oppositions between the 'West' and the 'rest', 'us' and 'them' and 'self' and 'other'. Proposing to shift the discussion on what constitutes the 'Other' as opposed to the 'Self' from philosophy and cultural studies to the social sciences, this book explores how the structural asymmetries existing between Western discourses and the realities of the non-Western world manifest themselves in the ideas, institutions and socio-political practices of India and China, and in how far they shape the social scientist's understanding of their discipline in general. It provides a counter-narrative by revealing the relativity of geographies, and by showing that the conventional presentation of core elements of the Asian socio-political set-up as 'aberrations' from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements. Drawing on multiple disciplines, concepts and contexts in India and China, the book makes a valuable contribution to the theory and practice of politics, as well as to International and Asian Studies.

The Elis James and John Robins' Show has become cult listening, and that cult has registered for charitable status, published quarterly accounts and been given a full blessing by the Archbishop of Broadcasting. It's official: Elis and John are a religion, and this book is their Holy Vible. Have you ever failed to Keep It Session? Is your new flatmate a complete coin? Have you ever eaten Space Raiders on the toilet and written 'Grief Is Living' in your journal? Then this book is for you. If not, don't worry, it won't be long before you're making up games, looking at Freddie, or facing your own personal farthing-gate. Our obsessions make us what we are, and though you may never have addressed a will to Brian May or cried watching Ronnie O' Sullivan make a 147, you'll have done something similar, and Elis and John are here to tell you that you're not weird, so come on in, and taste the vibe! Or should I say, READ the vibe!
