Veterinary Allergy

Types of allergy The most common type of allergy in pets is atopic dermatitis: a type I or direct-type hypersensitive reaction to inhalation allergens, such as pollen and mites. A flea allergy is a mixed allergy, a combination of direct-type I and delayed-type IV hypersensitivity, caused by contact with flea saliva.

Veterinary Allergy | Wiley Online Books

Pet allergy is caused by the protein in a pet's saliva, urine or dander (shed skin particles) Pet hair can also act as a carrier of other airborne allergens: pollen, house dust mite and mould which can cause symptoms in people with hay fever, asthma, or eczema onto the hair. Dog allergen is found mainly in the hair, dander and saliva.

YOUR QUICK GUIDE TO Pet Allergy

Veterinary Allergy PDF He was studying the immune response to tuberculosis and diphtheria, and was thus working at the interface between immunity and hypersensitivity. He proposed the use of the term "allergy" to imply "altered reactivity" in the host.
