Walk-behind saws cut through indoor flooring or outdoor pavement by an operator who holds the device upright and guides its direction by hand. Smaller concrete saws resemble lawn mowers in their design, while larger units look more like construction equipment.

Walk-Behind - Push Industrial Concrete Cut-Off Saws for ...

If your cutting is deeper than 4" (about 100mm) or the job scale is fairly big, you should use a wet concrete saw and laser welded diamond concrete saw blades to do the job. The concrete saw can be a handheld cut-off saw, a walk behind saw, or another type. The diameter of the laser welded diamond blade is usually no smaller than 12" (300mm).

How to cut concrete using a diamond cutter | 365 Contractors

Walk-behind saws do require a bit of room behind the blade to place the saw on. In order to cut this last 4' piece you'll have to turn the saw around later on to finish up the last 4'. If you are cutting short runs, such as control joints on a sidewalk, you will be better off with a hand-held saw.
