from 1999 - 2004 the yamaha 250 4-stroke, shaft drive, trail bike
was the bear tracker. *****same engine, same transmission, same
rear end, tire size, pull start - things they definitely changed in 1999
when they started calling them the bear tracker: - plastics became a
little longer i believe; and the seat without a doubt became longer.

I have a 2002 Yamaha Bear Tracker 250. When I start the ATV it runs fine at idle, but when i try to ride it with the choke off it cuts out and acts like it wants to die. If I ride it with the choke open just a little it runs fine. I have tried adjusting the needle on the carb so give it more fuel and also have had a full carb rebuilt kit put it in and new air filter.
